

Brian McGuigan, Director of Smart Cities, EMEA at Itron

Brian has worked in the development of innovative services and technologies for over 15 years, across the smart city, energy and medical sectors, with a focus on harnessing technology to deliver meaningful end user benefits.

Brian leads Itron's smart city activities in EMEA and has worked with many leading global cities to explore how flexible, standards based communication and data platforms can accelerate service innovation across the city – in areas such as traffic management, intelligent lighting, electric mobility and renewables.

Itron enables utilities and cities to safely, securely and reliably deliver critical infrastructure services, with over 200 million connected devices delivered globally, in hundreds of cities, such as London, Bristol, Glasgow, Copenhagen, Stockholm, San Francisco, Chicago, Melbourne, Paris and Singapore.
