#### **About WI-SUN ALLIANCE**

In 2011, a group of visionaries came together to form a global organization that could drive the adoption of Interoperable Smart Utility Networks, as described by IEEE® 802.15.4g.

Wi-SUN Alliance® is that organization, a member-based association made up of more than 300 industry leading companies worldwide. Its mission today is to

drive the global proliferation of interoperable wireless solutions for use in smart cities, smart grids and other Internet of Things (IoT) applications using open global standards from organizations, such as IEEE802, IETF, TIA, TTC and ETSI. Membership is open to all industry stakeholders and includes world-leading silicon vendors, product vendors, services providers, utilities, universities, enterprises, municipalities and local authorities.

Today, energy conservation, automated metering controls, and monitoring requirements are top priorities for progressive cities and communities around the world, and internet-based controls and monitoring strategies are gaining momentum. But much more work remains to be done to identify and articulate the common goals that will help Utility companies and Municipalities to optimize sophisticated and cost-saving energy controls.

Wi-SUN Alliance members are leading this challenge by driving new Smart Ubiquitous IoT Network applications and products through a shared perspective on interoperability that is so crucial to advancing “seamless connectivity.”

Wi-SUN Alliance seeks to advance seamless connectivity by promoting standards-based interoperability for global and regional markets. Key aspects of its mission include:

- Provide a forum for global collaboration to achieve Smart City and Smart Utility Communications Network Interoperability
- Grow the Wi-SUN ecosystem
- Lead industry growth based on IEEE 802.15.4g technology specifications and programs
- Support industry-agreed standards
- Deliver great product connectivity through a robust testing and certification program.

## ISUW 2021 SUPPORTING MINISTRIES

## An International Conference and Exhibition on Smart Energy and Smart Mobility for Smart Cities

ISUW 2021 has been scheduled from 02 - 05 March 2021 and it will be conducted on a DIGITAL PLATFORM as an International Conference and

Exhibition on Smart Energy and Mobility for Smarter Cities. Both Conference and Exhibition is planned on all 4 days. **5<sup>th</sup> edition of ISGF Innovation Awards 2021 will be organised as part of ISUW 2021 in the afternoon of 05th March 2021.**

ISUW 2021 will virtually bring together India's leading Electricity, Gas and Water Utilities, Policy Makers, Regulators, Investors and world's top-notch Smart Energy Experts and Researchers to discuss trends, share best practices and showcase next generation technologies and products in smart energy and smart cities domains. **The 3D Exhibition Booths at ISUW 2021 will offer never before experience to exhibitors and visitors.**

ISUW 2021 will include plenaries, interactive workshops, keynotes, technical sessions and technical paper presentations. Bi-lateral Smart Grid workshop with EU, USA, Switzerland, Sweden and France are also expected to be a part of the upcoming edition.

For Partnership, Exhibition and Participation queries, please write to us at [isuw@isuw.in](mailto:isuw@isuw.in). For more details about ISUW 2021, kindly visit [www.isuw.in](http://www.isuw.in).
