

# Wi-SUN FAN Certification Program

## Enabling Large-Scale, Outdoor IoT Networks

### What is the FAN Certification Program?

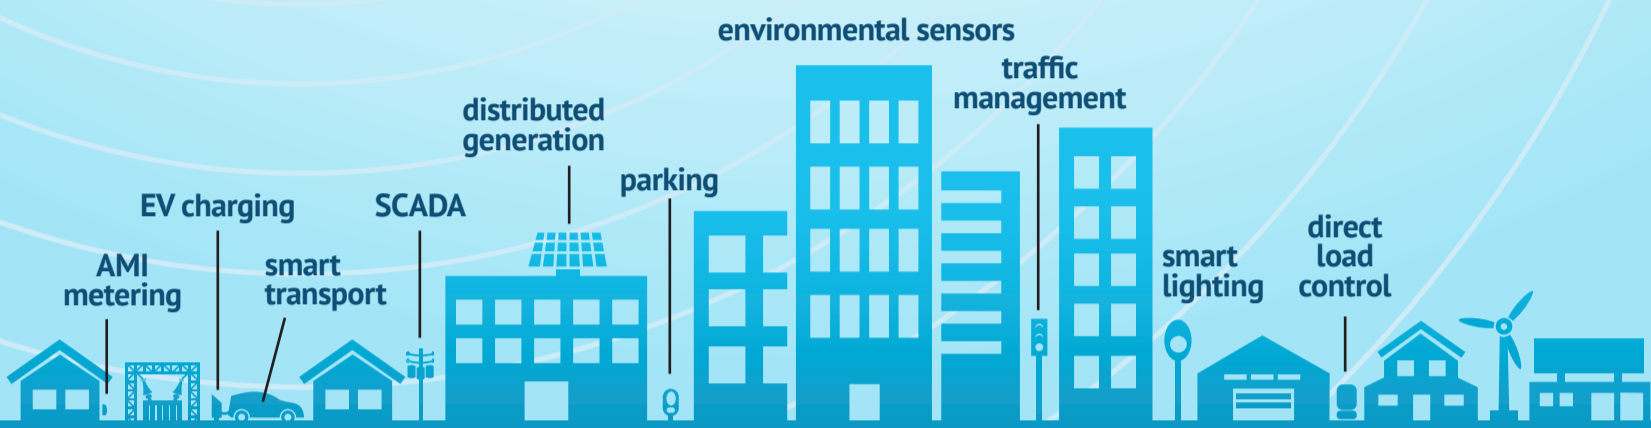

**FAN** "FIELD AREA NETWORK"

this is a BIG step forward

**CERTIFIED**

The FAN Certification Program has been developed by Wi-SUN Alliance to certify devices ...

The availability of the FAN Certification Program marks an important step in delivering on Wi-SUN's vision for true multi-vendor interoperability and customer choice

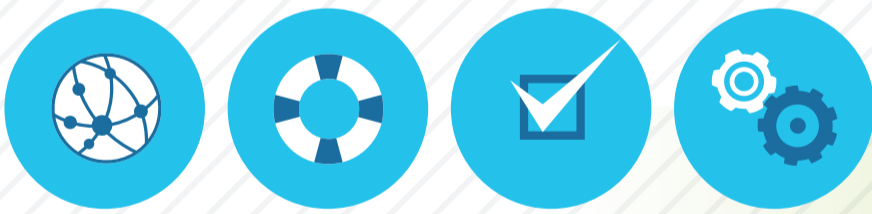

... for use by **utilities, cities and other service providers** to simplify large-scale **IoT infrastructure** rollouts.

Through **FAN Certification**, the Wi-SUN Alliance certifies products based on their compliance to a communications profile derived from **open standards** and their ability to **interoperate** with other Wi-SUN certified products.

this makes a BIG difference

### What are the benefits of FAN Certification?

ecosystem    less risk    standards    interoperability

For utilities, smart cities, FAN Certification ensures interoperability, which results in accelerated time to market.

non-proprietary    new features    time to market    cost savings

By obtaining FAN Certification, vendors can demonstrate their commitment to delivering quality and compliance to open standards.

### What is the Wi-SUN Alliance?

The Wi-SUN Alliance is a global non-profit member-based association made up of industry leading companies. Our goal is to drive the global proliferation of interoperable wireless solutions for use in smart cities, smart utilities and other Internet of Things (IoT) applications using open standards.
