

Wi-SUN™ Alliance has a four-tier membership program:

The Wi-SUN Alliance is a global non-profit member-based association made up of industry leading companies. Its mission is to drive the global proliferation of interoperable wireless solutions for use in smart cities, smart grids and other Internet of Things (IoT) applications using open global standards from organizations such as IEEE802, IETF, TIA, TTC and ETSI. With over 300 members representing 46 countries, membership of the Wi-SUN Alliance is open to all industry stakeholders and includes silicon vendors, product vendors, services providers, utilities, universities, enterprises and municipalities and local government organizations.

Promoters:

Members contribute to the development of specifications, have access to general working group sessions and a seat on the Board of Directors.

Contributors:

Members contribute to the development of specifications and have access to general working group sessions.

Test Labs (Observers):

Members may participate during the development of specifications. (Observer membership class is primarily applicable for Test Laboratories)

Adopters:

Members may access final approved version of specifications, attend member meetings and participate in specific marketing events, but cannot certify products.

Membership Fees

The following table shows the Wi-SUN Alliance fee structure.
